

## Dance with a beautiful partner on YOUR 100<sup>th</sup> birthday

*Authority on aging interventions will keep your audience engaged and entertained while providing valuable information they can use -- mainstream to controversial.*

- How I plan to dance with a beautiful partner on MY 100th birthday
- Why life goes downhill when we get old – why we disintegrate
- What we can do NOW – and what's in the FUTURE -- so we can stay young as long as we want
- Great sex when you get old
- Billions misspent and lives lost as government health care bureaucracy gets it wrong!
- Helping aging parents
- Big money will be made in aging reversal
- What celebrities and movie stars say about aging
- What some people are doing to help their PETS live healthy and long
- Are you “obese”, or just plain FAT?
- Are people living too long? And why do some experts say you should grow old and die?
- The biggest life-toppling event faced by people over 50, and what I'm doing about it
- Will you run out of money when you get old? The solution.
- The Far Side – Nanotech, people getting frozen, full body transplant
- How listeners can be the first to hear about the latest solutions for aging I could even close with a short health and longevity themed MUSICAL PERFORMANCE
- . . . much more – can be adjusted to YOUR audience and host

**People get so darn sick and miserable when they get old!**

**Decline and disease  
increase with age**

The good years of our lives – the healthy ones, when we're feeling great and loving life, we're productive, happy to be alive and able to do the things we want – are just too damn short! Then we get old, sick and take the big sleep == much too soon!

**My team of scientists and I are out to change that.**

So we target the underlying mechanisms of aging to create solutions – therapies and other innovations to slow, repair, control and ultimately reverse the underlying causes of age related decline that result in multiple diseases — rather than treating individual diseases as they occur.

The result: MORE HEALTHY, HAPPY, PRODUCTIVE YEARS OF LIFE, and solutions to

many great problems facing the world.

And if we can live a lot longer in great health, wouldn't that be great too?

Johnny Adams, MBA, CEO/  
Executive Director Aging Intervention  
Foundation, and expert on aging  
interventions.

My commitment is to “solve aging” i.e. slow and ultimately reverse age related decline for many more healthy years of living. I've been active in this since the 1970s, steadily building skills and accomplishments. I'm active in research and solutions creation with the foundation, and numerous initiatives to increase healthspan and lifespan.

**Imagine the good we could do - and the fun we could have - with longer health and more time!**
